

UI design in Figma

I based the design on a fictional space agency.

For the mock-up design for desktop and mobile in Figma I used:

Color palette:

I created a purely new and unique logo for this project:

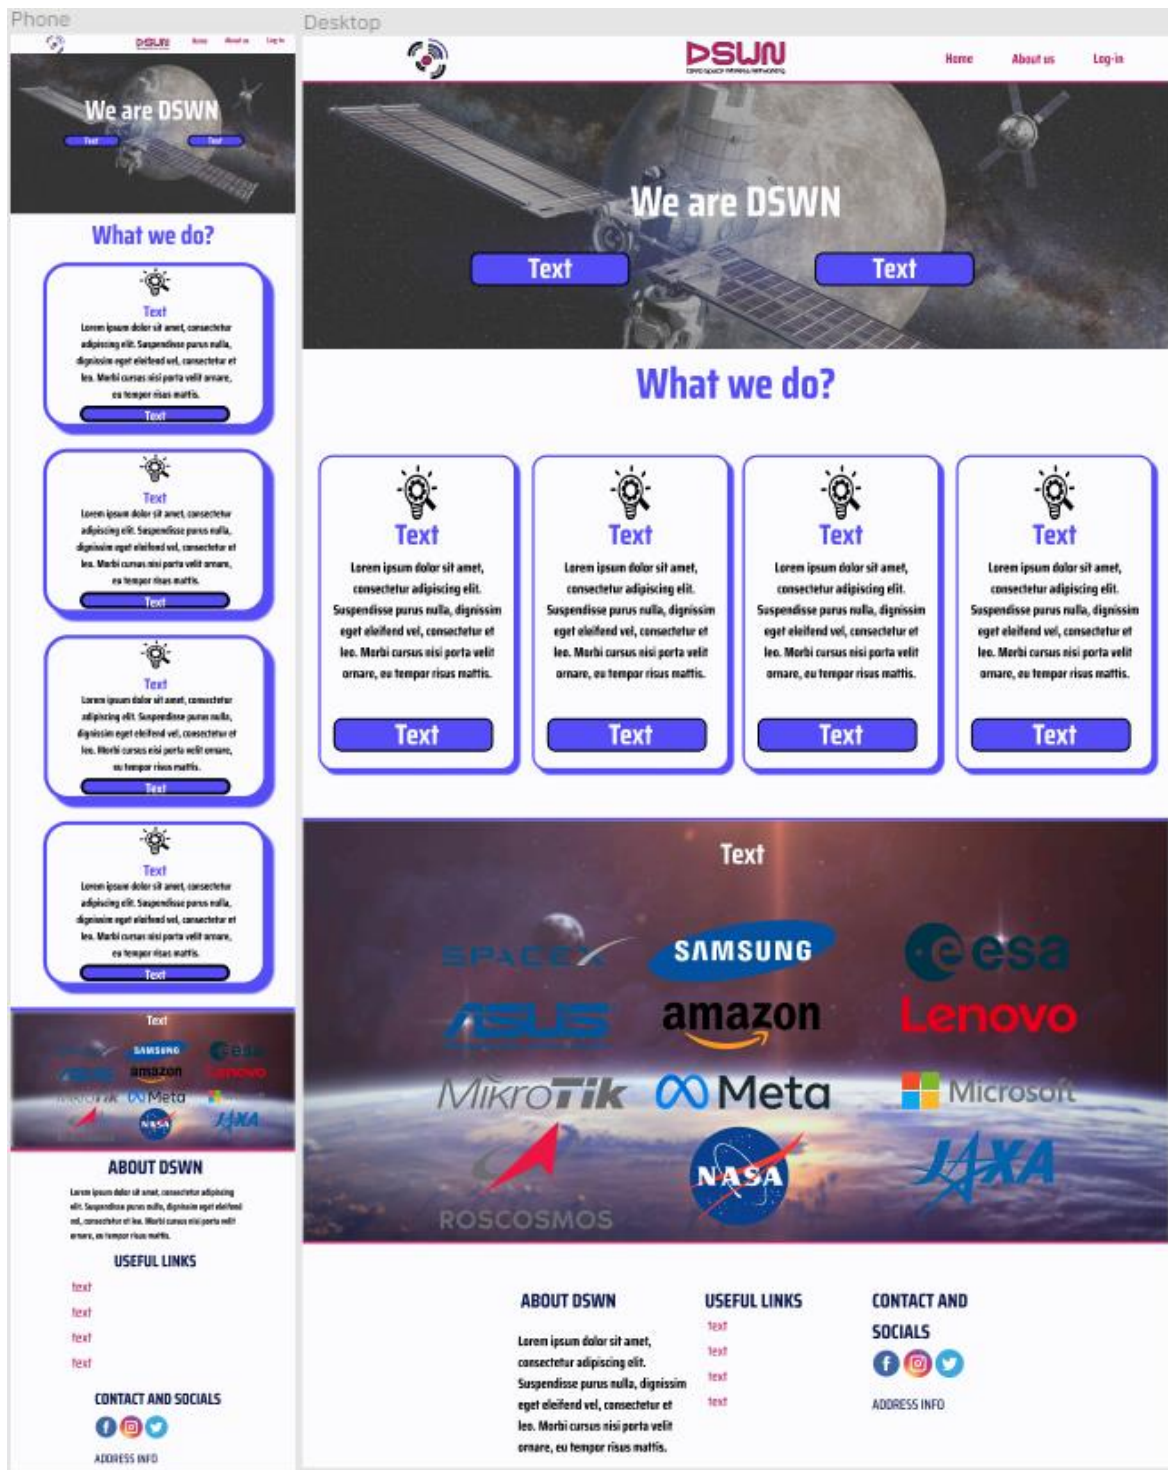

I used “Inter” font from Google (imported via Google’s API). Main font size is 20px, but you can see also, 40px, 55px, 30px fonts. For many fonts I used white color from the color palette (#fcfbfe), also used #ba1e68.

I have a few threshold numbers in CSS, but the main one is 920px. 810px and 378px are used to cover small overflowing issues.

I wasn’t sure about “menu”. Was it supposed to be dropdown or just on a page one. I made a page one.

Phone and Desktop versions:

Figma mock-up:
